BUILD AND DESIGN TRAINING SIMULATOR

Latest Technology Mobile ARFF Training Simulator

AM Risk takes pride in our ARFF Mobile Training Simulators with 15 years plus training experience in this field.

The Mobile Simulators are designed so that the Rescue Firefighters experience is as close to real life scenarios. Our Simulators are available in various configurations specifically designed for your needs.

Our Mobile ARFF Simulators Are Build And Constructed As Follows:

1. Pressure Fed Fuel (JetA1)
2. Build out of high tensile steel for longer life span
3. Protected with heat resistance paints
4. The mock encapsulates the following: wing, engine, landing gear and dammed fuel simulations
5. 1000 litres fuel tank with connections to the simulator
6. High pressure pump
7. Air Trailer to transport simulator from site to site
8. Fully licensed and registration with national Road Transport
9. Protection shield for operator
10. Emergency shut downs
11. Remote ignition system
12. Multiple Fuel Spill Fires
